## MESSAGE

I take this opportunity to congratulate the State Disaster Management Authority (SDMA) for preparing a comprehensive State Disaster Management Plan which integrates all the four phases of disaster management namely, prevention, response, mitigation and rehabilitation.

This plan will provide direction and guidance to different stakeholders in dealing with crisis situation. It will also enhance their capacity and facilitate positive action in all the phases of disaster management. This plan will help in the conduct of capacity building activities for both urban and rural communities and their participation in exercises and activities relating to prevention and preparedness for tackling multi-hazard vulnerabilities.

This plan has also taken into account the challenge of climate change and related issues faced by society today and touch on local coping mechanism.

I am sure that implementation of the plan in the State will lead to making Meghalaya more resilient to disasters.

  
(Dr Mukul Sangma)

### MESSAGE

*It is with a great joy to know that the Meghalaya State Disaster Management Plan is finally prepared.*

*The Plan will give a vast scope to the different stakeholders to tackle a wide range of disasters, both natural and man-made.*

*In this age of global warming and climate change, the plan will be a guiding light on how to take on the challenges that will prevail upon the State.*

*I, thus, dedicate this State Disaster Management Plan to the people of Meghalaya.*

(Prof. R.C. Laloo)

## **MESSAGE**

The Disaster Management Act, 2005, stipulates that every State will prepare its own disaster management plan, which will provide a framework to deal more effectively, promptly and systematically with disaster situations.

The State of Meghalaya, which lies in the seismically active Zone V, is also prone to floods, fires, landslides, cyclonic storms and lightning strikes, besides earthquakes.

The Meghalaya State Disaster Management Plan has been prepared keeping in mind all aspects of disaster management such as disaster preparedness, post-disaster response, restoration and rehabilitation, long term mitigation etc.

I am sure that this plan will be a helpful resource for the State Government and its various stakeholders in minimizing the effects of various natural and man-made disasters in the State.
